TECHNICAL DETAILS

DESCRIPTION

Make your robot or CNC move on rails super fast with a linear bearing platform. The platform is 34mm x 58mm and has four holes tapped for M4 machine screws so you can attach pretty much anything you want. All you need to get started is two 8mm supports and a precision-ground 8mm rod. Often times, CNC projects will have two of these on opposite sides to support a larger platform.

Comes as a single bearing. We have a bunch of bearings, supports and platforms that you may want to use with an 8mm based rail system so check out our CNC category

New Products 2/2/2013
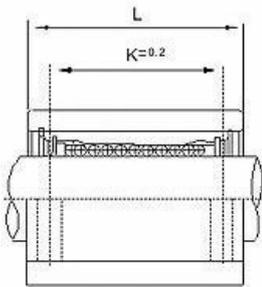

Linear Bearing Platform (Large) 8mm Diameter (4:00)

TECHNICAL DETAILS

- For 8mm linear railings
- Dynamic Load rating: 410 N
- Static Load rating: 800 N
- Weight: 94 grams
- Eight ball races
