## SMT CURRENT SENSE TRANSFORMERS

- Reight: 10.2mm Max
- R Footprint: 19.9mm x 14.5mm Max
- Current Rating: up to 35A
- Requency Range: 50kHz to 500kHz
- Reflow Temperature: 235°C
- R Moisture Sensitivity Level: 1

Electrical Specifications @ 25°C — Operating Temperature -55°C to +125°C										
- 56	Turns Ratio	Secondary	DCR (m							
Part <sup>5,6</sup> Number		Inductance (mH MIN)	Primary (11-12)	Secondary (2-4)	Hipot (V <sub>RMS</sub> )					
PL1839	50:1	1.4	0.42	700	1800					
PL1808	100:1	5.6	0.42	1400	1800					
PL1840	200:1	22.4	0.42	2900	1800					

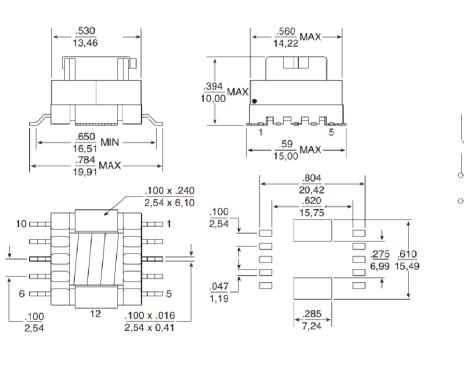

#### NOTES:

- 1. The temperature of the component (ambient temperature plus temper-ature rise) must be within the specified operating temperature range.
- 2.The maximum current rating is based upon temperature rise of the component and represents the DC current which will cause a typical temperature rise of 40°C with no airflow.
- 3. To calculate the value of the terminating resistor (Rt) use the following formula: Rt ( $\Omega$ ) = VREF \* N / (Ipeak\_primary)

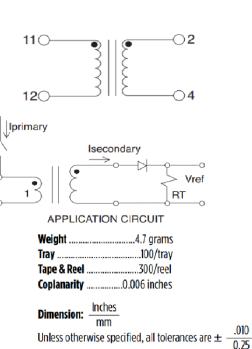

4. The peak flux density of the device must remain below 2000 Gauss. To calculate the peak flux density for a uni-polar current use the following formula:

Врк = 8.0 \* VREF \* (Duty\_Cycle\_Max) \* 10<sup>5</sup> / ( N \* Freq\_kHz)

\* for bi-polar current applications divide BPK as calculated above by 2.
5. Optional Tape & Reel packaging can be ordered by adding a "T" suffix to the part number (i.e. PL1839 becomes PL1839T). Pulse complies to industry standard tape and reel specification EIA481.

Notes:

1. All temperatures measured on the package leads.

2. Maximum times of reflow cycle: 2.
