Part Number TDGL015 - chipKIT PGM Programmer/Debugger

The chipKIT PGM by Digilent is a simple, low cost module that supports in-system programming and debugging of applications written for PIC MCU-based microcontroller boards such as the chipKIT™ and Cerebot boards.

The chipKIT PGM is designed to work with the MPLAB® v8 and MPLAB® X IDE. This allows the chipKIT boards, for example, to be used as a more traditional microcontroller development platform.

- Supports Microchip's 3.3V devices only
- Intended for use with the chipKIT Mx32, Uno32, uC32, and the Cerebot Mx3cK
- Includes USB A-MiniB cable and a right-angle 6 pin header

Digilent is a trusted Third Party Tool provider
