Overview

SBC Makeovers: The coolest DIY Case for coders

The DIY Case is designed for folks who love to make things: you can get fun, bright, and fabulous with the VIMs board, but you always get confused if you want to show something to your friends.
Now, it's time to show off your SBC board with your own CASE creations.

Highlights

- Compatible for all VIMs boards
- Suit for VIMs Heatsink
- Cooling fan mountable
- All primary ports including buttons accessible
- Clip-on GPIO lid allows access to those wonderful GPIO pins
- Removable top and bottom covers for stacking up on cluster application
- Power and activity lights visible through the end of the case
- Infrared remote controller works excellent
- Snug and secure fit protects your VIMs board and looks gorgeous
