

# M.A.C.™

## Mobile Autonomous Cobot

The M.A.C.™ is a fully-integrated\* solution that consists of an AMR (Autonomous Mobile Robot) with a collaborative robot topper.

**OMRON**

Sure Controls Inc is Omron's EXCLUSIVE partner for M.A.C. solutions to the USA, Mexico, and Canada

The Omron TM12 collaborative robot can perform many different repeatable tasks. The supplementary landmark feature can also be applied to identify and pinpoint objects precisely.

The Omron LD250 navigation reliability is best in class. The scanning system provides both safety and enables the M.A.C.™ to dynamically re-route around obstacles.

## M.A.C.™ Applications

Tend machines: load/unload parts, re-load feeders

Replace 2 or more low-use fixed cobots

Monitor process and take measurements

Pick samples and take to test lab

Empty rejects and take parts to disposal

Carry product to next processing step

AQI (Automated Quality Inspection)

Lab automation

Kitting

Assembly

Social distancing

Pick n' place

*\*Robot end-of-arm-tool sold separately*
