

00585700 & 00586970 CONNECTORS

7-Pole Plastic Body EBS Sockets • 24V • ISO 7638-1

Description

The EBS system conforming to ISO/DIN 7638 is compulsory on all vehicles weighing over 3,5 tons. These connectors are used for the electrical connection of the EBS braking system between a truck tractor and a trailer or semitrailer in the commercial vehicles sector, both for 24V and 12V electrical systems. The connectors are available in a 7 pole version for the EBS braking system. EBS requires two additional contacts in order to permit the exchange of data between cab and trailer, so as to optimize the braking effect. The sockets are provided with an expulsion system of the plug in case it is not plugged in correctly.

Features and Benefits

- Standards: Conforms to ISO 7638-1 standards.
- Conforms to ADR/GGVS norm requirements for vehicles transporting hazardous goods.
- Version of crimp contacts with a special tool.
- Version of screw contacts (suitable for the spare parts market)
- Mechanical resistance and watertightness guarantee an efficient and reliable electrical connection.

Specifications Overview

Voltage: 24V
Standards: ISO 7638-1
