16-bit D-type transparent latch; 30 Ω series termination resistors; 5 V tolerant inputs/outputs; 3-state

Rev. 4 — 14 May 2013

Product data sheet

1. General description

The 74LVC162373A and 74LVCH162373A are 16-bit D-type transparent latches with separate D-type inputs with bus hold (74LVCH162373A only) for each latch and 3-state outputs for bus-oriented applications. One latch enable (pin nLE) input and one output enable (pin nOE) are provided for each octal. Inputs can be driven from either 3.3 V or 5 V devices. When disabled, up to 5.5 V can be applied to the outputs. These features allow the use of these devices in mixed 3.3 V and 5 V applications. The device consists of two sections of eight D-type transparent latches with 3-state true outputs. When pin nLE is HIGH, data at the corresponding data inputs (pins nDn) enter the latches. In this condition, the latches are transparent, that is, the latch output changes each time its corresponding data inputs changes. When pin nLE is LOW, the latches store the information that was present at the data inputs a set-up time preceding the HIGH to LOW transition of pin nLE.When pin nOE is LOW, the contents of the eight latches are available at the outputs. When pin nOE is HIGH, the outputs go to the high-impedance OFF-state. Operation of the nOE input does not affect the state of the latches.

The device is designed with 30 Ω series termination resistors in both HIGH and LOW output stages to reduce line noise. Bus hold on data inputs eliminates the need for external pull-up resistors to hold unused inputs.

2. Features and benefits

- 5 V tolerant inputs/outputs for interfacing with 5 V logic
- Wide supply voltage range from 1.2 V to 3.6 V
- CMOS low power consumption
- Multibyte flow-through standard pinout architecture
- Multiple low inductance supply pins for minimum noise and ground bounce
- Direct interface with TTL levels
- All data inputs have bus hold (74LVCH162373A only)
- High-impedance when V_{CC} = 0 V
- Complies with JEDEC standard:
 - ◆ JESD8-7A (1.65 V to 1.95 V)
 - ◆ JESD8-5A (2.3 V to 2.7 V)
 - ◆ JESD8-C/JESD36 (2.7 V to 3.6 V)

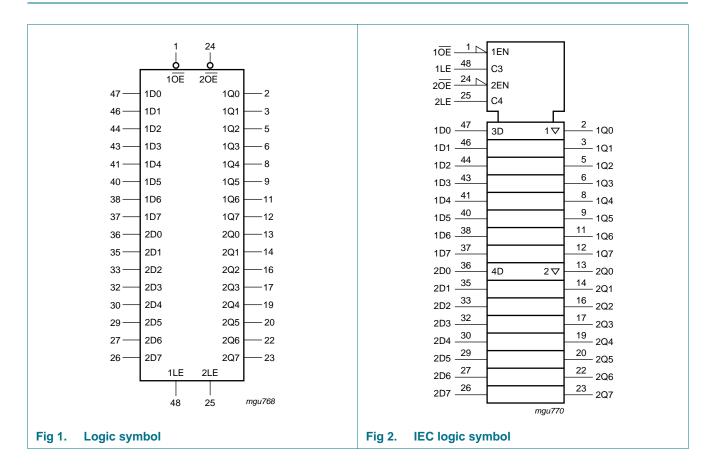

- ESD protection:
 - ◆ HBM JESD22-A114F exceeds 2000 V
 - ◆ MM JESD22-A115-B exceeds 200 V
 - ◆ CDM JESD22-C101E exceeds 1000 V
- Specified from -40 °C to +85 °C and -40 °C to +125 °C

3. Ordering information

Table 1. Ordering information

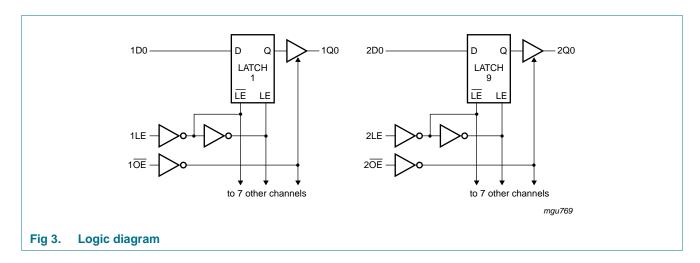

| Type number | Package | | | | | | | | |
|------------------|-------------------|---------|---|----------|--|--|--|--|--|
| | Temperature range | Name | Description | Version | | | | | |
| 74LVC162373ADGG | −40 °C to +125 °C | TSSOP48 | plastic thin shrink small outline package; | SOT362-1 | | | | | |
| 74LVCH162373ADGG | | | 48 leads; body width 6.1 mm | | | | | | |
| 74LVC162373ADL | −40 °C to +125 °C | SSOP48 | plastic shrink small outline package; 48 leads; | SOT370-1 | | | | | |
| 74LVCH162373ADL | | | body width 7.5 mm | | | | | | |

6. Functional description

Table 3. Functional table (per section of 8 bits)[1]

| Operating modes | Input | | Internal Latch | Output nQn | |
|---|-------|-----|----------------|------------|---|
| | nOE | nLE | nDn | | |
| Enable and read register (transparent mode) | L | Н | L | L | L |
| | L | Н | Н | Н | Н |
| Latch and read register | L | L | I | L | L |
| | L | L | h | Н | Н |
| Latch register and disable outputs | Н | L | I | L | Z |
| | Н | L | h | Н | Z |

^[1] H = HIGH voltage level

h = HIGH voltage level one set-up time prior to the HIGH-to-LOW LE transition

7. Limiting values

Table 4. Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134). Voltages are referenced to GND (ground = 0 V).

| Symbol | Parameter | Conditions | Min | Max | Unit |
|------------------|-------------------------|--|-------------------|-----------------------|------|
| V_{CC} | supply voltage | | -0.5 | +6.5 | V |
| I _{IK} | input clamping current | V _I < 0 V | -50 | - | mA |
| VI | input voltage | | [<u>1</u>] -0.5 | +6.5 | V |
| I _{OK} | output clamping current | $V_O > V_{CC}$ or $V_O < 0 V$ | - | ±50 | mA |
| Vo | output voltage | output HIGH or LOW state | [<u>2</u>] -0.5 | V _{CC} + 0.5 | V |
| | | output 3-state | [<u>2</u>] -0.5 | +6.5 | V |
| Io | output current | $V_O = 0 V to V_{CC}$ | - | ±50 | mA |
| I _{CC} | supply current | | - | 100 | mA |
| I _{GND} | ground current | | -100 | - | mA |
| T _{stg} | storage temperature | | -65 | +150 | °C |
| P _{tot} | total power dissipation | $T_{amb} = -40 ^{\circ}\text{C} \text{ to } +125 ^{\circ}\text{C}$ | [3] - | 500 | mW |
| | | | | | |

^[1] The minimum input voltage ratings may be exceeded if the input current ratings are observed.

74LVC_LVCH162373A

L = LOW voltage level

I = LOW voltage level one set-up time prior to the HIGH-to-LOW LE transition

Z = high-impedance OFF-state

^[2] The output voltage ratings may be exceeded if the output current ratings are observed.

^[3] Above 60 °C, the value of P_{tot} derates linearly with 5.5 mW/K.

8. Recommended operating conditions

Table 5. Recommended operating conditions

| Symbol | Parameter | Conditions | Min | Тур | Max | Unit |
|------------------|-------------------------------------|--|------|-----|----------|------|
| V_{CC} | supply voltage | | 1.65 | - | 3.6 | V |
| | | functional | 1.2 | - | - | V |
| VI | input voltage | | 0 | - | 5.5 | V |
| Vo | output voltage | output HIGH or LOW state | 0 | - | V_{CC} | V |
| | | output 3-state | 0 | - | 5.5 | V |
| T _{amb} | ambient temperature | in free air | -40 | - | +125 | °C |
| Δt/ΔV | input transition rise and fall rate | V _{CC} = 1.65 V to 2.7 V | 0 | - | 20 | ns/V |
| | | $V_{CC} = 2.7 \text{ V to } 3.6 \text{ V}$ | 0 | - | 10 | ns/V |

9. Static characteristics

| | | V _{CC} = 3.6 V | | -500 | - | - | | -500 | - | μΑ |

^[1] All typical values are measured at V_{CC} = 3.3 V (unless stated otherwise) and T_{amb} = 25 °C.

74LVC_LVCH162373A

^[2] The bus hold circuit is switched off when $V_I > V_{CC}$ allowing 5.5 V on the input pin.

^[3] Valid for data inputs (74LVCH162373A) only; control inputs do not have a bus hold circuit.

^[4] The specified sustaining current at the data inputs holds the input below the specified V_I level.

^[5] The specified overdrive current at the data input forces the data input to the opposite logic input state.

10. Dynamic characteristics

Table 7. Dynamic characteristics

Voltages are referenced to GND (ground = 0 V). For test circuit see Figure 10.

| | | $V_{CC} = 2.3 \text{ V to } 2.7 \text{ V}$ | | 2.0 | - | - | 2.0 | - | ns |
| | | $V_{CC} = 2.7 \text{ V}$ | | 0.9 | - | - | 0.9 | - | ns |
| | | $V_{CC} = 3.0 \text{ V to } 3.6 \text{ V}$ | | +0.9 | -1.0 | - | +0.9 | - | ns |
| t _{sk(o)} | output skew time | $V_{CC} = 3.0 \text{ V to } 3.6 \text{ V}$ | [3] | - | - | 1.0 | - | 1.5 | ns |
| C_{PD} | power dissipation | per input; $V_I = GND$ to V_{CC} | <u>[4]</u> | | | | | | |
| C | capacitance | $V_{CC} = 1.65 \text{ V to } 1.95 \text{ V}$ | | - | 10.8 | - | - | - | pF |
| | | $V_{CC} = 2.3 \text{ V to } 2.7 \text{ V}$ | | - | 13.0 | - | - | - | pF |
| | | $V_{CC} = 3.0 \text{ V to } 3.6 \text{ V}$ | | - | 15.0 | - | - | - | pF |

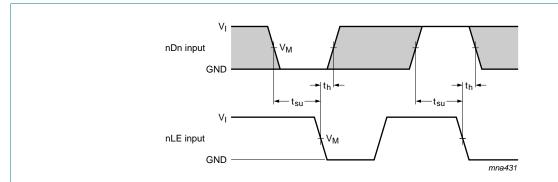

- [1] Typical values are measured at $T_{amb} = 25$ °C and $V_{CC} = 1.2$ V, 1.8 V, 2.5 V, 2.7 V and 3.3 V respectively.
- [2] t_{pd} is the same as t_{PLH} and t_{PHL} .
 - t_{en} is the same as t_{PZL} and $t_{\text{PZH}}.$
 - $t_{\mbox{\scriptsize dis}}$ is the same as $t_{\mbox{\scriptsize PLZ}}$ and $t_{\mbox{\scriptsize PHZ}}.$
- [3] Skew between any two outputs of the same package switching in the same direction. This parameter is guaranteed by design.
- [4] C_{PD} is used to determine the dynamic power dissipation (P_D in μW).
 - $P_D = C_{PD} \times V_{CC}^2 \times f_i \times N + \Sigma (C_L \times V_{CC}^2 \times f_o)$ where:
 - f_i = input frequency in MHz; f_o = output frequency in MHz
 - C_L = output load capacitance in pF
 - V_{CC} = supply voltage in Volts
 - N = number of inputs switching
 - $\Sigma(C_L \times V_{CC}^2 \times f_o)$ = sum of the outputs

11. AC waveforms

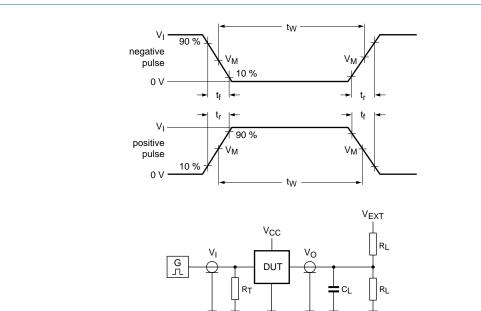

Measurement points are given in <u>Table 8</u>. The shaded areas indicate when the input is permitted to change for predictable output performance.

Fig 9. Data set-up and hold times for the nDn input to the nLE input

Table 8. Measurement points

| Supply voltage | Input | | Output | | |
|------------------|----------|---------------------|----------------------------|--------------------------|------------------|
| V _{CC} | VI | V _M | V _M | V _X | V _Y |
| 1.2 V | V_{CC} | $0.5 \times V_{CC}$ | $0.5 \times V_{\text{CC}}$ | V _{OL} + 0.15 V | $V_{OH}-0.15\ V$ |
| 1.65 V to 1.95 V | V_{CC} | $0.5 \times V_{CC}$ | $0.5 \times V_{CC}$ | $V_{OL} + 0.15 V$ | $V_{OH}-0.15\ V$ |
| 2.3 V to 2.7 V | V_{CC} | $0.5 \times V_{CC}$ | $0.5 \times V_{CC}$ | $V_{OL} + 0.15 V$ | $V_{OH}-0.15\ V$ |
| 2.7 V | 2.7 V | 1.5 V | 1.5 V | V _{OL} + 0.3 V | $V_{OH}-0.3~V$ |
| 3.0 V to 3.6 V | 2.7 V | 1.5 V | 1.5 V | V _{OL} + 0.3 V | $V_{OH}-0.3~V$ |

001aae331

Test data is given in Table 9.

Definitions for test circuit:

R_L = Load resistance.

C_L = Load capacitance including jig and probe capacitance.

 R_T = Termination resistance should be equal to output impedance Z_o of the pulse generator.

V_{EXT} = External voltage for measuring switching times.

Fig 10. Test circuit for measuring switching times

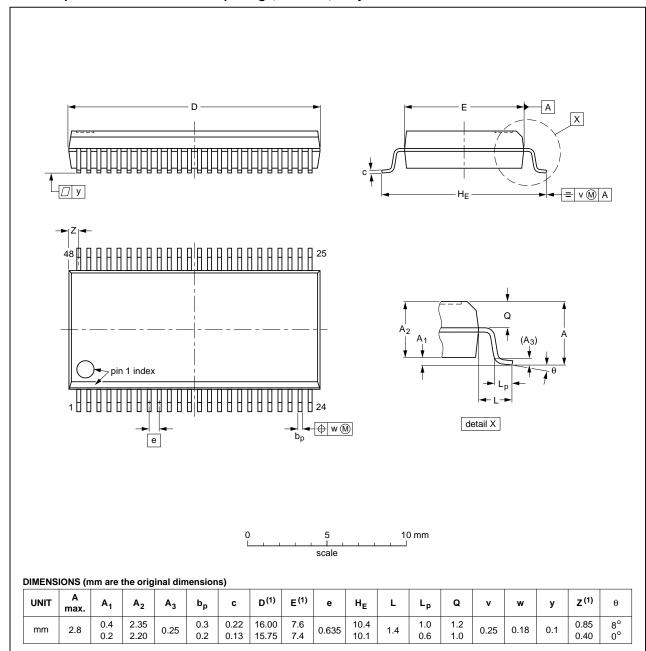

Table 9. Test data

| Supply voltage | Input | Input | | Load | | V _{EXT} | | |
|------------------|----------|---------------------------------|-------|--------------|-------------------------------------|--------------------|-------------------------------------|--|
| | VI | t _r , t _f | CL | R_L | t _{PLH} , t _{PHL} | t_{PLZ}, t_{PZL} | t _{PHZ} , t _{PZH} | |
| 1.2 V | V_{CC} | ≤ 2 ns | 30 pF | 1 kΩ | open | $2\times V_{CC}$ | GND | |
| 1.65 V to 1.95 V | V_{CC} | ≤ 2 ns | 30 pF | 1 kΩ | open | $2\times V_{CC}$ | GND | |
| 2.3 V to 2.7 V | V_{CC} | ≤ 2 ns | 30 pF | 500Ω | open | $2\times V_{CC}$ | GND | |
| 2.7 V | 2.7 V | ≤ 2.5 ns | 50 pF | 500Ω | open | $2\times V_{CC}$ | GND | |
| 3.0 V to 3.6 V | 2.7 V | ≤ 2.5 ns | 50 pF | 500Ω | open | $2\times V_{CC}$ | GND | |

15. Legal information

15.1 Data sheet status

| Document status[1][2] | Product status[3] | Definition |
|--------------------------------|-------------------|---|
| Objective [short] data sheet | Development | This document contains data from the objective specification for product development. |
| Preliminary [short] data sheet | Qualification | This document contains data from the preliminary specification. |
| Product [short] data sheet | Production | This document contains the product specification. |

- [1] Please consult the most recently issued document before initiating or completing a design.
- [2] The term 'short data sheet' is explained in section "Definitions"
- [3] The product status of device(s) described in this document may have changed since this document was published and may differ in case of multiple devices. The latest product status information is available on the Internet at URL http://www.nexperia.com.

15.2 Definitions

Draft — The document is a draft version only. The content is still under internal review and subject to formal approval, which may result in modifications or additions. Nexperia does not give any representations or warranties as to the accuracy or completeness of information included herein and shall have no liability for the consequences of use of such information.

Short data sheet — A short data sheet is an extract from a full data sheet with the same product type number(s) and title. A short data sheet is intended for quick reference only and should not be relied upon to contain detailed and full information. For detailed and full information see the relevant full data sheet, which is available on request via the local Nexperia sales office. In case of any inconsistency or conflict with the short data sheet, the full data sheet shall prevail.

Product specification — The information and data provided in a Product data sheet shall define the specification of the product as agreed between Nexperia and its customer, unless Nexperia and customer have explicitly agreed otherwise in writing. In no event however, shall an agreement be valid in which the Nexperia product is deemed to offer functions and qualities beyond those described in the Product data sheet.

15.3 Disclaimers

Limited warranty and liability — Information in this document is believed to be accurate and reliable. However, Nexperia does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information. Nexperia takes no responsibility for the content in this document if provided by an information source outside of Nexperia.

In no event shall Nexperia be liable for any indirect, incidental, punitive, special or consequential damages (including - without limitation - lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory.

Notwithstanding any damages that customer might incur for any reason whatsoever, Nexperia's aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the *Terms and conditions of commercial sale* of Nexperia.

Right to make changes — Nexperia reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

Suitability for use — Nexperia products are not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or equipment, nor in applications where failure or malfunction of a Nexperia product can reasonably be expected to result in personal injury, death or severe property or environmental damage. Nexperia and its suppliers accept no liability for inclusion and/or use of Nexperia products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk

Applications — Applications that are described herein for any of these products are for illustrative purposes only. Nexperia makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

Customers are responsible for the design and operation of their applications and products using Nexperia products, and Nexperia accepts no liability for any assistance with applications or customer product design. It is customer's sole responsibility to determine whether the Nexperia product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products.

Nexperia does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using Nexperia products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). Nexperia does not accept any liability in this respect.

Limiting values — Stress above one or more limiting values (as defined in the Absolute Maximum Ratings System of IEC 60134) will cause permanent damage to the device. Limiting values are stress ratings only and (proper) operation of the device at these or any other conditions above those given in the Recommended operating conditions section (if present) or the Characteristics sections of this document is not warranted. Constant or repeated exposure to limiting values will permanently and irreversibly affect the quality and reliability of the device.

Terms and conditions of commercial sale — Nexperia products are sold subject to the general terms and conditions of commercial sale, as published at http://www.nexperia.com/profile/terms, unless otherwise agreed in a valid written individual agreement. In case an individual agreement is concluded only the terms and conditions of the respective agreement shall apply. Nexperia hereby expressly objects to applying the customer's general terms and conditions with regard to the purchase of Nexperia products by customer.

No offer to sell or license — Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights.

16-bit D-type transparent latch; 30 Ω resistors; 5 V tolerance; 3-state

Export control — This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.

Non-automotive qualified products — Unless this data sheet expressly states that this specific Nexperia product is automotive qualified, the product is not suitable for automotive use. It is neither qualified nor tested in accordance with automotive testing or application requirements. Nexperia accepts no liability for inclusion and/or use of

non-automotive qualified products in automotive equipment or applications.

In the event that customer uses the product for design-in and use in automotive applications to automotive specifications and standards, customer (a) shall use the product without Nexperia's warranty of the product for such automotive applications, use and specifications, and (b) whenever customer uses the product for automotive applications beyond

Nexperia's specifications such use shall be solely at customer's own risk, and (c) customer fully indemnifies Nexperia for any liability, damages or failed product claims resulting from customer design and use of the product for automotive applications beyond Nexperia's standard warranty and Nexperia's product specifications.

Translations — A non-English (translated) version of a document is for reference only. The English version shall prevail in case of any discrepancy between the translated and English versions.
