Activating The Compiler License

In order to use all features of MikroElektronika Compilers for AVR microcontrollers an activation must be performed. This document briefly explains the terms related to the compiler license, and guides the customer through the software activation procedure.

Q. What is a MikroElektronika Compiler License?

MikroElektronika Compiler license is the permission to use a MikroElektronika Compiler with all its features. License is granted to the customer by MikroElektronika as a licensor. The customer must purchase the license rights and then apply a License Activation Key to unlock the Compiler and remove the Demo Limit. The customer is bound to comply with the Terms of Usage defined in the Software License Agreement.

Q. What is the Activation Key?

The Activation Key is a uniqe sequence comprising 20 characters and numbers. It is delivered to the user upon purchase. The Activation Key is located at the back of the License Activation Card. At all times, Activation Key remains the property of MikroElektronika.

Q. What is Software Activation?

Activation is a process of validation of the Activation Key. Successful Activation removes the Demo Limit and unlocks all software features.

Q. How to Perform the Activation?

1. Download and install the desired Compiler for AVR from www.mikroe.com/avr/compilers or from the Product DVD.

2. Start the application. Open the Help menu and click the Software Activation option.

3. Enter the Activation Key in the Key fields. Type in your general information in the fields below as well.

4. Click the Activate button.

Figure 1-1: Help menu contains the Software Activation item.

Q. What is Software Registration?

Registration is a process which establishes a unique connection between MikroElektronika as a Licensor and the customer as a Licensee. By registering his copy of the Compiler, the customer is granted access to Live Updates, Technical Support and other benefits.

Q. Why should I keep my Activation Key a secret?

Publishing, renting, broadcasting or otherwise disclosing the Activation Key to a third party is strictly prohibited. By doing so the customer may loose all benefits granted by registration. In case of severe violations of the Software License Agreement, MikroElektronika reserves the right to delicense the customer and request the removal of the Activation Key from the customer's computer.
