Description

The U209-005-C USB-C to DB9 Serial Adapter Cable (M/M) allows you to connect a 9-pin RS-232 serial peripheral to a device with a USB-C port. Perfect for connecting a modem, digital camera, PDA or ISDN terminal to your computer, laptop, tablet or smartphone, this cable supports data transfer speeds up to 230 Kbps, which is twice as fast as a built-in serial port. No external power source is required. The compact five-foot cable tucks away conveniently in your backpack or laptop bag for use anywhere.

Premium foil and braid shielding delivers reliable, error-free signal quality and protection from EMI/RFI interference. Molded nickel-plated connectors with gold-plated contacts ensure excellent conductivity. Integral strain relief ensures the cable and connectors last a long time. A rugged PVC jacket protects twisted 28 AWG data lines and 24 AWG power lines.
