

## Medium current, high performance, low voltage PNP transistor

### **Features**

- Very low collector to emitter saturation voltage
- DC current gain, h<sub>FE</sub> >100
- 3 A continuous collector current
- 40 V breakdown voltage V<sub>(BR)CER</sub>
- SOT-223 plastic package for surface mounting circuits in tape and reel packing

## **Applications**

- Power management in portable equipment
- Voltage regulation in bias supply circuits
- Switching regulator in battery charger applications
- Heavy load driver

## **Description**

The device in manufactured in low voltage PNP planar technology by using a "Base Island" layout. The resulting transistor shows exceptional high gain performance coupled with very low saturation voltage.

## 3 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com
