| H20 SERIES INCREMENTAL ENCODER

Introduction

The Model H20 is a compact encoder designed to economically fill the resolution range up to 10,000 cycles per turn. This compact unit features a precision disc, precision ball bearings and EMI shielding. The encoder meets IP66 sealing requirements when ordered with the shaft seal and one of the available connectors.

Features

- Compact size to fit in tight installations
- Well-sealed for dusty and wet environments

•

Sensata

Technologies

- Shielded against EMI
- Reverse voltage protection
- Over voltage protection
- Output protection diode
- Any resolution from 1 to 10000 is available

Applications

- Machine control
- Process control and automation
- Agricultural machinery
- Robotics
- Food processing
- Metering operations

Mechanical

Shaft Diameter	3/8" and 1/4" diameters standard.			
Flat on Shaft	Standard on 3/8" shaft, 0.60" long; Special feature on 1/4" shaft			
Shaft Loading	3/8" shaft: Up to 10 lbs axial and 20 lbs radial			
Shaft Runout	.001 T.I.R. maximum			
Starting Torque at 25°C	1.0 in-oz max. without shaft seal; 2.5 in-oz max with shaft seal			
Bearings	High precision ball bearings, Material: Chrome steel			
Shaft Material	Stainless Steel			
Bearing Housing	Die cast aluminum with protective finish			
Cover	Die cast aluminum with protective finish			
Bearing Life	$2x10^8$ revs at rated load, 1 x 10^{10} revs at 10% rated load			
Maximum RPM	10,000 RPM (see frequency response, below)			
Moment of Inertia	2.56 X 10 ⁻⁴ oz-in-sec ²			
Weight	9 oz. typical			

Electrical

Code	Incremental
Output Format	2 outputs in quadrature, A leads B CCW, 1/2 cycle index , Z, gated with negative B Consult factory for other output formats.
Cycles per Shaft Turn	1 to 10000
Supply Voltage	5 to 28 VDC +/- 5%
Current Requirements	100 mA typical + output load, 250 mA (max)
Voltage/Output	28/V: Multi-Voltage Line Drive, 5–28 VDC in, Vout = Vin 28/5: TTL, RS422 Line Driver, 5–28 VDC in, Vout = 5 VDC 28/0: NPN Line Driver Open Collector, 5–28 VDC in, NPN out (30V MAX) 28/VR, HTL Line Driver 5-28 VDC in, Vout=Vin 120 mA per channe 5, 12, 15 or 24/OR: R=100 ohm / V: 5V=470 ohm, 15V=1.5K ext. I
Protection Level	Reverse, overvoltage and line driver output protection diodes
Frequency Response	300 kHz

Environmental

Enclosure Rating	IP66 when ordered with shaft seal and MS connector on cover. IP65 when ordered with shaft seal and cable gland. IP50 when ordered with no shaft seal.
Temperature	Operating temperature -40° C up to 85° C standard. Check factory for higher temperature options. Storage temperature -40° C to 100° C
Shock	100 g's for 5 msec duration
Vibration	50 to 2000 Hz @ 30grms
Humidity	98% RH without condensation

Notes and Tables: All notes and tables referred to in the text can be found in the pages that follow.

- The shaft seal is recommended in virtually all installations. The most common exceptions are applications requiring a very low starting torque or those requiring operation at both high temperature and high speed.
- Complementary outputs are recommended for use with line driver type (source/sink) outputs. When used with differential receivers, this combination provides a high degree of noise immunity.
- Output IC's are available as either Line Driver (LD) or NPN Open Collector (O) types.
- Open Collectors require pull-up resistors, resulting in higher output source impedance (sink impedance is similar to that of line drivers). In general, use of a Line Driver style output is recommended.
- Line Drivers source or sink current and their lower impedance mean better noise immunity and faster switching times. Warning: Do not connect any line driver outputs directly to circuit common/OV, which may damage the driver. Unused outputs should be isolated and left floating.
- Our applications specialists would be pleased to discuss your system requirements and the compatibility of your receiving electronics with Line Driver type outputs.
- Special -S at the end of the model number is used to define a variety of non-standard features such as special shaft lengths, voltage options, or special testing. Please consult the factory to discuss your special requirements.

AGENCY APPROVALS & AVAILABLE CERTIFICATIONS

Special Models of the H20 Incremental Encoder are available with one or more of the following certifications. Consult with factory in order to ensure how to correctly specify the agency approval(s) that you require.
