★★★★☆ **Just what I need**

The Capacitor Kit was just what I needed in capacitors. It had a variety of capacitors, ranging from 10 picofarad to 100 microfarad. The larger capacitors are very good, and seem reliable, for cutting power supply glitches, and the smaller ones in timing circuits.on the 555. They came on time, too, which i was pleased with. Ordering wasn't too difficult, after being found on the SparkFun site. Because of this, I think this is a good buy.
