ICO RALLY, ProFIT, ProTECT, ProFLO, ProMARK and all product denoted with TM are trademarks or registered trademarks of ICO RALLY.

TEFLON is a registered trademark of E.I. du Pont de Nemours and Company Corporation

HALAR is a registered trademark of Ausimont U.S.A., Inc. Corporation

LIMITATIONS OF WARRANTY, REMEDY, AND LIABILITY

ICO RALLY warrants that products delivered are free from defects in material and workmanship and meets all specifications, which are in effect on the date of shipment. ICO RALLY makes no other warranty expressed or implied. All specifications are subject to change without notice.

Responsibility for validity in final applications or products remains the responsibility of the user. ICO RALLY encourages user testing, and will gladly provide standard product line samples for testing purposes.

All parties agree the Buyer's sale and exclusive remedy shall be for the repair or replacement of any defective part provided by the Seller. The essential purpose of this remedy shall be deemed fully satisfied as long as ICO RALLY is willing to repair or replace the defective part.

In no event shall ICO RALLY's liability under any claim exceed the price paid by the Buyer to ICO RALLY for the particular product, given rise to the claim. ICO RALLY will not be liable under any circumstances for any claim or liability based on breach of warranty or breach of contract including but not limited to loss of income, loss of profits, loss of sales, loss of use or damage to equipment, increased costs of operation, labor or facilities, or claims by third parties.

No person(s) or company is authorized to make any oral or written representations on ICO RALLY's behalf, which exceeds the foregoing.

The gripping strength of spiral wrap tubing is enhanced by both its torsional cut and its rigid profile. It retains its strength under repeated flexing and bending and follows wire paths easily, which yields neat, free-running cable bundles. It is extremely useful on long continuous runs where many leads are required; wires can enter or break out at any point. Spiral wrap can be removed easily for troubleshooting and then re-applied.

- SWP** Polyethylene
- SWP** Polyethylene (black)
- SWN** Nylon (natural)
- SWN** Nylon (black)
- SWT** PTFE

Versatile, low cost material. In addition to above, this material contains ultra-violet inhibitors, designed outdoor use. This material offers best mechanical protection and has a higher temperature rating than polyethylene. In addition to above, this material contains ultra-violet inhibitors, designed outdoor use. This material is primarily used in high temperature applications. It also has an extremely low operating temperature and is not affected by organic solvents or acids.

SWP - POLYETHYLENE

Conforms to A-A-59602

*** Occasional random lengths

XPF and **XPNF** are light weight, self-fitting, monofilament sleeveings designed to encapsulate and protect cable bundles and wire assemblies. These expandable sleeveings adjust to irregular surfaces and contours, providing abrasion resistance and protection with a minimum of bulk and weight. Polyester ICO-FLEX is available in flame retardant (**XPF**) or non-flame retardant polyester monofilament (**XPNF**).

XPFH is an expandable sleeving produced from light weight Halar Fluoropolymer monofilament. It is ideal for high temperature applications where low out-gassing is required.

UL File Number: E142828
Operating Temp. Range: -94°F (-70°C) to 250°F (125°C)

*Flame retardant sleeving is identified with colored tracers. Non-flame retardant sleeving is a solid color.

FLEX GUARD WIRE LOOM

WIRE PROTECTION SLEEVE

FGP's unique design permits easy, fast installation as a harness protective covering. The loom provides an easy opening seam for quick wire insertion. Since this seam is not permanently sealed, the costs for repair or service is reduced. Made of durable polyethylene, it is a harness covering material, resistant to temperature, weather and corrosion conditions. The convoluted surface enhances the appearance of your product by providing a uniform, tailored finish.

Operating Temperature Range: -40°F (-40°C) to 175°F (120°C)
 Standard Colors: Black* (Non-Flame Retardant)
 Gray (Flame Retardant)
 Standard Shipping Length: Coils

Note: Standard Material is slit. Un-slit material also available.

SLV-105 is a low cost, flexible, high temperature vinyl with excellent electrical, mechanical and thermal properties for applications up to 221°F (105°C).

SLV-40 is an extremely flexible material designed primarily for low temperature applications down to -85°F (-65°C), with continuous rating of 175°F (80°C). Widely used in applications where general purpose vinyls lose their flexibility.

Applicable Specifications: MIL-I-631, Grade C
UL File Number: E52612
Operating Temperature Range: 15°F (-10°C) to 220°F (105°C)
Standard Colors: Black and Clear*
Standard Shipping Length: Spools

Applicable Specifications: MIL-I-7444

SLV-130 combines fiberglass and a vinyl insulation jacket. It has good abrasion resistance, excellent cut through characteristics, and non-fray ends. It is widely used in applications up to 265°F (130°C) where tubing is subject to knotting, bending, and high torque.

SLV-1200 is a sleeving of tightly braided 100% fiberglass for use in temperatures up to 1200°F (650°C). Closely woven construction provides maximum abrasion resistance and high flexibility. The material is treated to remove all organic matter and to render the glass braid fray-resistant.

Applicable Specifications: MIL-I-3190, Class B, Grade B
Operating Temp. Range: -5°F (-20°C) to 265°F (130°C)
Standard Color: Black*
Std. Shipping Length: Spools

Applicable Specifications: MIL-I-3190, Class C
Operating Temp. Range: -75°F (-60°C) to 1200°F (650°C)
Standard Color: Natural
Std. Shipping Length: Spools

STL is a lightweight, extra thin wall PTFE tubing that provides the performance properties inherent to PTFE at a lower cost. The lighter weight material creates a more flexible tubing without sacrificing the maximum continuous operating temperature of 500°F (260°C).

Appl. Specifications: AMS-3651B & AMS-3654
 UL File Number: E52612
 Operating Temp. Range: -103°F (-75°C) to 500°F (260°C)
 Flammability: VW-1
 Standard Color: Natural* (Translucent to opaque white)
 Std. Shipping Length: Coils or spools (1/8" I.D. and above)

STT is the most popular thin wall PTFE tubing offering maximum mechanical and electrical protection. Unlike other conventional thermoplastic materials, Teflon will not shrink if exposed to a hot soldering iron. In addition, PTFE will not absorb moisture and has the lowest coefficient of friction of all materials.

Appl. Specifications: AMS-3651B & AMS-3655
 UL File Number: E52612
 Operating Temp. Range: -103°F (-75°C) to 500°F (260°C)
 Flammability: VW-1
 Standard Color: Natural* (Translucent to opaque white)
 Std. Shipping Length: Coils or spools (1/8" I.D. and above)

STS standard wall PTFE tubing is utilized in most military applications. Special extrusion techniques produce a pin-hole-free tubing with uniform concentricity. **STS** is ideal for applications where heat resistance, excellent dielectric values, and chemically inert properties are required.

Appl. Specifications: AMS-3651B, AMS-3653
& MIL-I-22129C

UL File Number: E52612

Operating Temp. Range: -103°F (-75°C) to 500°F (260°C)

Flammability: VW-1

Standard Color: Natural (Translucent to opaque white)

Std. Shipping Length: Coils or spools (1/8" I.D. and above)

The heavy wall construction of **TTF** offers the highest dielectric strength of all ICO RALLY's PTFE sleeving products. **TTF** is the sleeving product of choice for applications that require an aggressive operating temperature range, high dielectric strength, and maximum rigidity.

Appl. Specifications: AMS-3651B

Operating Temp. Range: -103°F (-75°C) to 500°F (260°C)

Flammability: VW-1

Standard Colors: Natural (Translucent to Opaque White)

Std. Shipping Length: Coils

SLW-PVCP is a general-purpose sleeving repair product that employs a light-weight, flexible jacket of vinyl-coated polyester and an adhesive closure. **SLW-PVCP** is valuable in applications where flexibility, tear resistance, and abrasion resistance is required. Installation is as easy as wrapping the product around the wire or cable, removing the protective liner from the adhesive and overlapping the side edges to create a tube.

Operating Temperature Range: -4°F (-20°C) to 212°F (100°C)
 Flammability: VW-1
 Standard Color: Black
 Standard Shipping Length: Spools

SLW-ALPU is an EMI shielding material that utilizes polyurethane jacketed aluminum foil. This product is ideal for electrical applications where shielding is necessary. **SLW-ALPU** is installed by wrapping the split tubing around the wire or cable assembly and sticking the side edges together using the adhesive liner to form a protective tube.

Avg. Shielding Attenuation: 102 dB (10MHz - 20GHz)
 Flammability: VW-1
 Standard Color: Black
 Standard Shipping Length: Spools

SLW-ALFG utilizes a high-performance acrylic adhesive to bond aluminum and polymer-coated fiberglass. This repair product is exceptionally useful in moderate temperature heat barrier applications (<300 °F). A protective enclosure is created by wrapping the split tubing around the wire and cable assembly, removing the liner from the adhesive, and sticking the side edges together to form a tube.

Maximum Operating Temperature: 450°F (232°C)
 Flammability: Self-extinguishing
 Standard Color: Silver
 Standard Shipping Length: Spools

SLW Repair Tubing as supplied.
 Select size based on outside diameter of wire or cable assembly which requires repair.

1. Clean surface of substrate that will be exposed to inside diameter of **SLW** product.
2. Position **SLW** product over area which requires repair with adhesive strip facing **down**.
3. Remove protective liner from adhesive strip.
4. Fold adhesive strip side under opposing edge to create a tight-fitting tube.
